

Serial No. 09/994,644  
Response dated December 9, 2005  
Reply to Office Action of September 9, 2005

Attorney Docket No. PF02047NA

**Amendments to the Claims:**

1. (Currently Amended) A method of selectively forwarding a file to a consumer of the file, the method including the steps of:

retrieving the file from a server;

evaluating the file to determine whether resources required for utilization of the file are available ~~network resources are available to transport said file~~;

forwarding the file to the consumer when said resources are available; and

forwarding a message corresponding to the file to the consumer of the file when the resources are unavailable, wherein the message indicates that appropriate resources are unavailable and asks the consumer whether file information should be saved or not for later consumption.

2. and 3. (Canceled)

4. (Original) The method of claim 1 wherein said step of evaluating said file includes a step of assessing communications unit resources required for utilization of said file.

5. (Original) The method of claim 4 wherein said step of assessing said communications unit resources includes determining one of a size of the file, a graphic content of the file, a post transport processing capacity corresponding to the file; and a display capability required for the file.

6. (Canceled)

9. (Currently Amended) A communications device for retrieving files from a network, the communications device comprising:

a transceiver for interfacing to a radio access network;

a user input output (I/O) including a display; and

a controller, coupled to said transceiver and said user I/O, further comprising a browser

that operates to:

request a file located at a network server,

receive the file when network resources are available to transport said file, and

receive a message corresponding to the file when said resources are unavailable,

wherein said message is coupled to said display and offers a choice of saving or not saving file information.

10. (Canceled)

11. (Original) The communications device of claim 10 wherein said message offers a choice of locations for saving said one of said file and said address for said file.

12. (Original) The communications device of claim 9 wherein a reminder corresponding to said file is shown on said display until said file is received.

13. (Currently Amended) A gateway operating to selectively forward files to a communications device, the gateway comprising:

a first port arranged to communicate with the communications device;

a second port arranged to communicate with a server; and

a controller, coupled to said first port and to said second port, operating as an agent for the communications device for:

retrieving a file from said server;

evaluating said file to determine whether network resources are available to transport said file;

forwarding said file to the communications device when said resources are available; and

forwarding a message corresponding to said file to the communications device when the resources are unavailable, wherein said message indicates that appropriate resources are unavailable and asks whether file information should be saved or not.

14. (Original) The gateway of claim 13 wherein evaluating said file includes assessing whether radio network resources are available to transport said file.

15. (Original) The gateway of claim 14 wherein said assessing further includes determining whether a channel with appropriate quality of service is available for transporting said file.

16. (Original) The gateway of claim 13 wherein said evaluating said file includes a step of assessing communications device resources required for utilization of said file.

17. (Original) The gateway of claim 16 wherein said step of assessing said communications device resources includes determining one of a size of said file, a graphic content of said file, a post transport processing capacity corresponding to said file, and a display capability required for said file.

18. (Canceled)

19. (Original) The gateway of claim 18 further operating to forward a message that provides a choice of locations for storing said one of the file and said address for the file.

20. (Original) The gateway of claim 18 further operating to trigger a reminder corresponding to said file at the communications device and removing said reminder when said file has been received.

21. (Original) The gateway of claim 18 further operating to trigger a reminder corresponding to said file at a second communications device.

22. (Original) The gateway of claim 21 wherein said reminder includes sending an email too said second communications device, said email including a URL for said file.
